MICROORGANISMS DESTROY OIL POLLUTION

KLAIPEDA, June 7, ELTA - A facility maintained by Naftos Terminalas Ltd. has begun operation in Kiskenai Village near Klaipeda. The facility uses a special bacteria called Degradiol to clean up soil which has been comtaminated by oil pollution. The microrganisms are the product of Biocentras, Ltd., which holds a patent on the process. The polluted soil will be trucked to the processing plant during the winter and treated and returned to its original locations during the summer.

If you have a question, comment or suggestion about anything you hear on the Lithuanian Voice, or perhaps something you would like to hear, please drop us a line at 4249 Lambert Road, Cleveland, OH 44121. You may also call us at 382-9268 or send a FAX at 382-4133. We are always on the lookout for people in the Lithuanian Community who are doing something interesting, unusual or exciting. If you know of someone who fits that description, or if you are one of those interesting people, please get in touch with us; we might like to put you on the air.

And with that we are all out of time on the program this morning. I'd like to thank our intern Becki Trivison for her technical assistance and thanks to you listeners for joining me today; I hope to see you all next Sunday morning at 9:45 for the English-language version of the week's news from Lithuania as well as items of local interest here in northeast Ohio.

Until next time, this is Greg Priddy for the Lithuanian Voice saying, "Thanks for listening and have a safe and happy 4th of July and a pleasant week". Atsisveikino iki kito sekmadienis, Sudiev.
